

Java Developer Intern — 2 Hour Assignment (Compressed)

Goal

Build a **very small but functional OPD mini-module** covering: **Patient Registration**, **Appointment Booking**, and **Doctor Consultation Summary**, using **Spring Boot**, **JPA**, **Angular**, and **MySQL**. Keep it demo-ready.

Scope (Limited to 3–4 Hours)

1. Patient Registration (Basic)

- Add a patient: name, gender, age, phone number.
- List patients.
- Simple search by name or phone.

2. Appointment Booking (Basic Flow)

- Book an appointment for a patient: date/time + doctor.
- List appointments for today.

3. Consultation Summary (Simple)

- For an appointment, allow the doctor to enter: vitals (any 2 fields), short notes.
- Mark consultation complete.
- View completed consultations for a patient.

(Optional if time permits)

- Basic login (no full RBAC needed).
 - Sample reports.
-

Deliverables

1. **Working backend** (Spring Boot + JPA) with REST APIs.
2. **Simple Angular UI** with 3 screens:
 - Patient Register/List
 - Appointment Book/List
 - Consultation form

3. Be ready to **explain the code flow & functional flow** during review.
-
